

JAY LALJIBHAI PITRODA

Vadodara, Gujarat 390023 | pitrodajay6@gmail.com | +91 9409662002

PROFESSIONAL SUMMARY

Motivated Information Technology undergraduate with hands-on experience leading cross-functional teams in hackathons, innovation projects, and large-scale campus events. Skilled in UI/UX design, cybersecurity fundamentals, and full-stack web technologies. Demonstrated ability to manage projects end-to-end, from ideation to execution, with strong communication and organizational skills.

EDUCATION

Bachelor of Engineering – Information Technology 2022 – 2026

Sardar Vallabhbhai Patel Institute of Technology (SVIT), Vasad, Gujarat

Higher Secondary Education (12th Grade) 2022

Bright Day School, Vadodara, Gujarat

Secondary Education (10th Grade) 2020

Bright Day School, Vadodara, Gujarat

INTERNSHIP EXPERIENCE

UI/UX Designer & Generative AI Developer Jan 2025 – Jun 2025

24x7 Moneyworks Consulting Pvt. Ltd. (BankBenchers) | Vadodara, Gujarat 6 Months

- Led end-to-end UI/UX design and backend integration for KisanSetu — a digital agricultural marketplace — covering wireframes, user flows, Figma prototypes, Supabase database setup, live multi-user bidding, Resend mail API, OTP verification, and AI chatbot integration.
- Designed complete UI for eKCC (electronic Kisan Credit Card) loan platform including Profile, Leave Application, Add Guarantor (OTP flow), Update Loan, Joint Applicant journey, and ePACS module; conducted structured UI/UX audits resolving all mentor feedback across multiple iterations.
- Redesigned the eKCC public website end-to-end — created visual theme, UI components, custom illustrations, and all sections (Home, Why Choose Us, Our Offerings, About Us, FAQs, Blogs, Footer).
- Built and tested a custom MCP (Model Context Protocol) server using n8n workflow automation to generate structured React code from Figma designs, advancing Figma-to-code automation.
- Integrated Sarvam AI Text-to-Speech API for Aadhar Authentication in eKCC, enabling vernacular voice support for rural users.
- Designed the ProFit App end-to-end in Figma including high-fidelity prototype with micro-interactions and a final UI/UX audit; resolved all review comments for handover.
- Developed BankBenchers HRMS app UI including Employee Attendance tracking, Leave Management flow, Admin Panel, and user-side functionality.
- Created BankBenchers Brand Guidelines covering logo usage, colour palette, typography, patterns, and social media DPs; finalized for company-wide rollout after iterative review.
- Produced festival and brand social media creatives (Republic Day, Mahashivratri, Holi, Gudi Padwa, Good Friday, Ram Navami, Mahavir Janma Kalyanak) maintaining brand consistency.
- Coordinated with the Frontend development team to review, monitor, and refine KisanSetu's live implementation; presented a working product demo at a college review.

TECHNICAL SKILLS

Programming & Web: HTML, CSS, JavaScript, Python, DSA, React (via MCP/Figma-to-code)

Design Tools: Figma, Figma Make, Canva (UI/UX Design, Prototyping, Brand Guidelines)

Backend & Integrations: Supabase, Resend Mail API, Sarvam AI (Text-to-Speech), n8n Automation, MCP Server

Domain Knowledge: Cybersecurity, Embedded Systems, Generative AI, Workflow Automation, Agri-tech, Fintech (eKCC/KCC)

Languages: English, Hindi, Gujarati

PROJECTS

TerraWing – Hybrid Drone-Rover Robot

SSIP-GTU Innovation Project

Project Lead

- Led a team of 5 in designing and developing a hybrid drone-rover robot capable of multi-terrain mobility combining aerial and ground navigation.
- Managed full project lifecycle including hardware prototyping, embedded systems programming, and system integration.
- Coordinated official documentation and communications for SSIP-GTU submissions.

KisanSetu – Digital Agricultural Marketplace Platform

24x7 Moneyworks / Internship Project

UI/UX Design | Backend Implementation (Supabase) | Frontend (Figma Make) | AI Chatbot Integration

- Built a farmer-to-buyer direct trading platform eliminating intermediaries, enabling fair pricing, transparency, and secure transactions at scale.
- Designed a Smart Listing System allowing farmers to list crops with quantity, quality, price, and images supporting both auction and fixed-price selling modes.
- Implemented a Real-Time Bidding engine where buyers compete dynamically; highest bidder wins after time expiration, maximizing farmer profit.
- Developed an Escrow Payment Flow: buyer deposits funds held securely → seller accepts bid → buyer confirms delivery → payment released, building trust between parties.
- Enabled Partial Lot Purchase functionality, allowing small and large buyers to purchase portions of available stock — a rare feature compared to traditional mandis.
- Built a Transparency Dashboard featuring live bid tracking, price comparison, and market insights; architected for future AI-based price prediction and demand analysis.
- Integrated an AI chatbot to assist farmers and buyers with platform navigation, listing guidance, and transaction queries.
- Key USP: Combined e-commerce + auction model with escrow security in agriculture — increases farmer profit margins, reduces intermediary dependency, and digitizes rural trade.

TrashBid – Smart Waste Auctioning System

Smart India Hackathon (SIH)

Project Lead

- Conceptualized and led development of a digital platform enabling real-time bidding and smart allocation of recyclable waste to vendors.
- Guided team through all phases: ideation, design, prototyping, and final presentation.
- Achieved 2nd rank in the ideathon round; recognized for innovation in waste management and sustainability.
- Represented the project at Mecia Hacks 2.0 (SVIT), receiving positive judge feedback for scalability and impact.

LEADERSHIP & ACTIVITIES

Vice General Secretary – Student Central Committee

2024 – 2025

SVIT Vasad

- Oversaw institution-level event planning and student engagement as part of the Student Central Committee leadership.
- Played a key role in organizing Malhar – Annual Day 2025, managing logistics, creative direction, artist coordination, and inter-departmental collaboration.
- Led execution of Tune Carnival, a grand musical concert featuring Bollywood artist Mohit Chauhan, attended by 3,000+ participants; managed artist hospitality, stage setup, and crowd management.
- Collaborated with external agencies, sponsors, and technical teams to deliver large-scale campus events.
- Initiated sub-events and pre-fest campaigns to drive student participation and cultural engagement.
- Coordinated between faculty, administration, and student teams to ensure smooth event flow and institutional compliance.

Design Team Lead – Mecia Hacks 2.0 Organizing Committee

SVIT Vasad

Intra-College Hackathon

- Led all design and branding for SVIT's flagship hackathon, Mecia Hacks 2.0.
- Created complete visual identity including the event logo, posters, social media creatives, brochures, and merchandise.

- Managed and mentored a team of student designers using Figma and Canva.
